So, what can you do for wildlife? Ask your group for ideas. Make notes.

<u>School?</u>
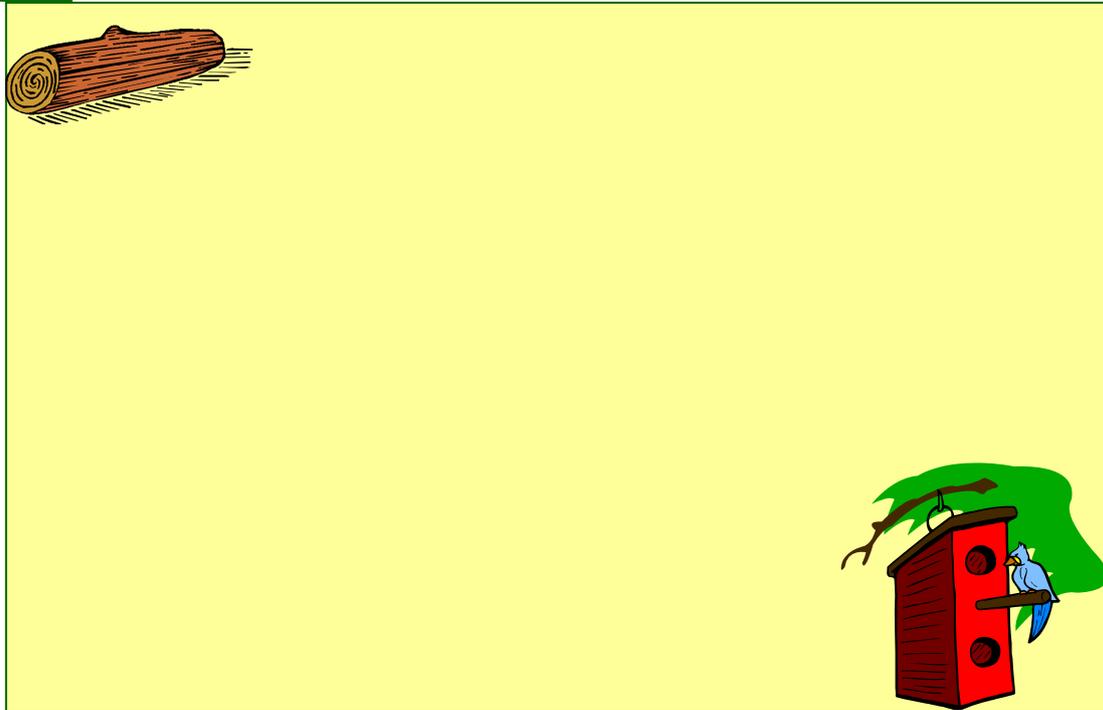

<u>Home?</u>

Now bring your ideas to the class.

Could you raise money to help you improve your school for wildlife?
You could look at the websites of these and similar companies to give you ideas.

http://www.fones4schools.co.uk/

http://www.thefundraising.co.uk/index_files/Page673.htm
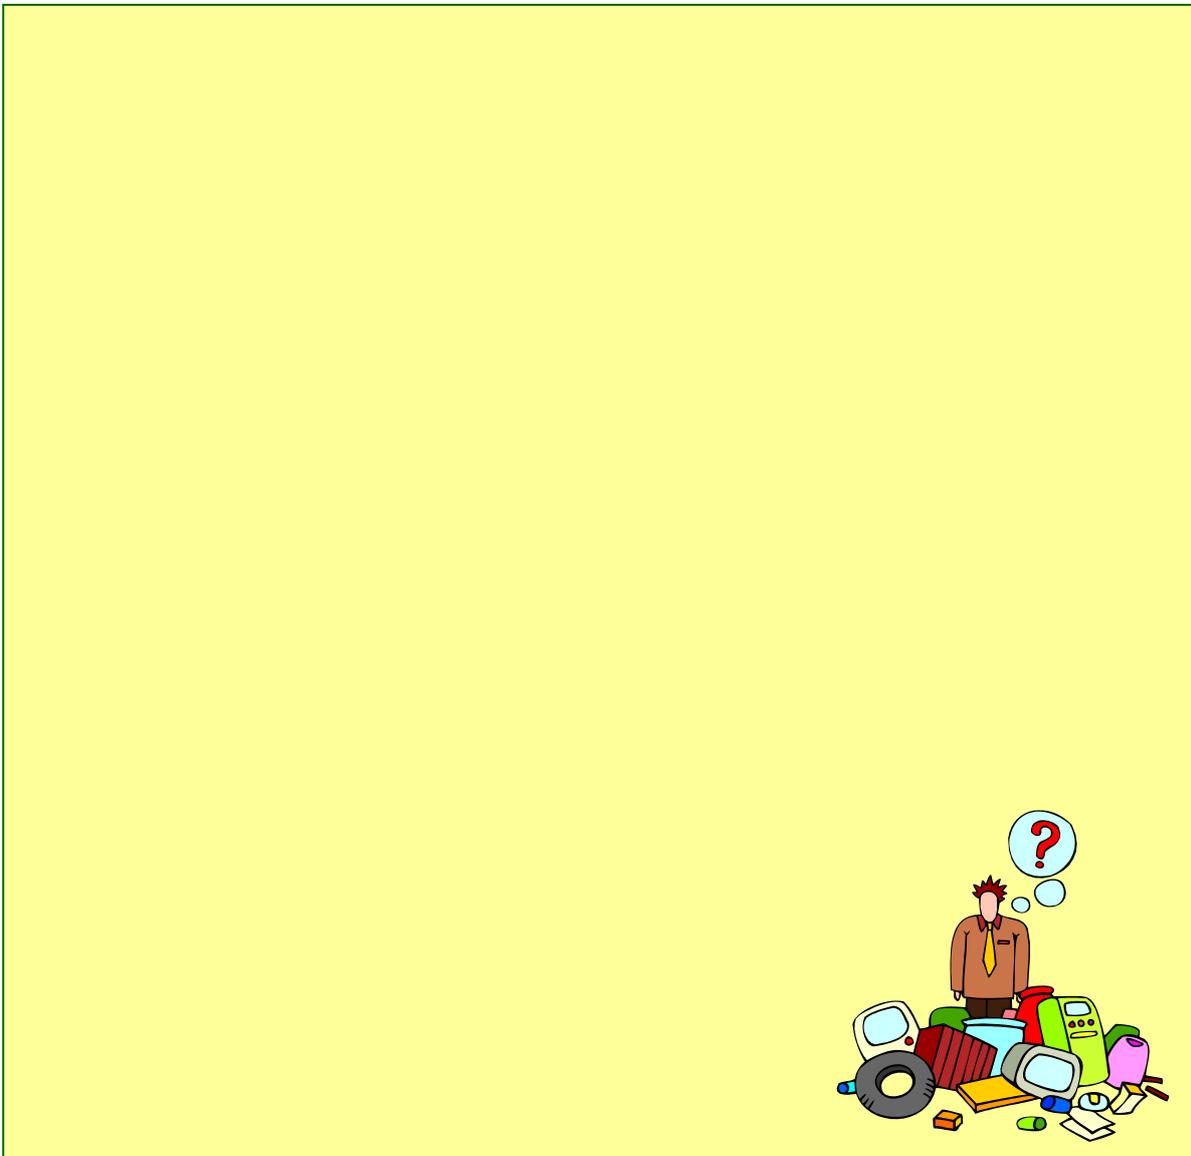

http://www.ideasfundraising.co.uk/

Check out other websites. Make notes about them.
Then feed back to your class and your teacher. (Always take great care when surfing the internet!)

Now look below to see if you can improve your school and home for wildlife.

HOW GOOD IS MY HOME FOR THE ENVIRONMENT?

Does my home have?

	Yes	No	Score
1) More than 3 different types of trees	10	0	
2) Fallen tree trunks or logs left lying around	10	0	
3) A wild patch or wildflowers for insects	10	0	
4) Nectar plants in pots, planters or hanging baskets	10	0	
5) Plants of different heights, (not trees)			
a) knee height	10	0	
b) waist height	10	0	
c) chest height	10	0	
d) head height or larger	10	0	
6) Holes in trees or nest boxes	10	0	
7) Lichen on tree trunks, walls or roof	10	0	
8) A wet, boggy, pond or marsh area	10	0	
9) Do you feed the birds regularly?	10	0	
Do you?			
10) Always switch off electrical equipment	10	0	
11) Take a shower instead of a bath	10	0	
12) Have your home well insulated	10	0	
13) Boil only the amount of water needed	10	0	

Score: 100+ Well done! Could you still improve further?
      80/99 Not bad! Keep trying. How could you improve?
      40/79 Oh! You could do better than this!
       0/39 Oh, dear! Lots of room for improvement!

Discuss this as a class:

WHAT A TURN OFF!

The energy consumption of the devices used by teenagers is greater than the output of all the country's wind turbines!

The value of electricity wasted by devices on STANDBY is £100,000,000 a year!

SWITCH IT OFF AT THE WALL!

Mobile phone chargers draw the same amount of electricity from the plug, whether they are connected or not. Use a SOLAR CHARGER.

PCs and monitors continue to use electricity, even when switched off. The only way to prevent waste is to switch them off at the wall.

Almost 1/3 of all the electricity used by teenagers is wasted through leaving appliances on standby.

By the age of 16, every child will generate 88 tons of carbon dioxide. That's more than 60,000,000 tons for all of today's 16 year-olds.
